Contents for Volume 165

Number 1, 7 *November* 1993

BEHN, U., VAN HEMMEN, J. L. and SULZER, B., Memory to Antigenic Challenge of the Immune System: Synergy of Idiotypic Interactions and Memory B Cells 1

MEIJERHOF, R. and VAN BEEK, G., Mathematical Modelling of Temperature and Moisture Loss of Hatching Eggs 27

ERNEUX, T., EDSTROM, R. D. and GOLDBETER, A., Enzyme Sharing in Phosphorylation–Dephosphorylation Cascades: The Case where One Protein Kinase (or Phosphatase) Acts on Two Different Substrates . . 43

ACERENZA, L., Metabolic Control Design 63

GROMIHA, M. M. and PONNUSWAMY, P. K., Relationship Between Amino Acid Properties and Protein Compressibility 87

NOVAK, B. and TYSON, J. J., Modeling the Cell Division Cycle: M-phase Trigger, Oscillations, and Size Control 101

Number 2, 21 *November* 1993

CHOWDHURY, D., A Unified Model of Immune Response II: Continuum Approach 135

PAUPLIN, Y., Minimum Evolution and Goodness-of-fit 161

GHOSH, S., Relaxation of Membrane Channels: A Statistical Mechanical Approach 171

TORRES, J.-L. and TRAINOR, L. E. H., Energy Function for a Model of Ant Colonies 177

MATTHECK, C., BETHGE, K. and SCHÄFER, J., Safety Factors in Trees . . 185

VISSCHER, P. K., A Theoretical Analysis of Individual Interests and Intracolony Conflict During Swarming of Honey Bee Colonies . . 191

CANNINGS, C., TYRER, J. P. and VICKERS, G. T., Routes to Polymorphism . 213

TRIBUTSCH, H. and POHLMANN, L., Co-operative Electron Transfer: Superconduction in Biomolecular Structures? 225

HUYNEN, M. A., KONINGS, D. A. M. and HOGEWEG, P., Multiple Coding and the Evolutionary Properties of RNA Secondary Structure . . . 251

Number 3, 7 *December* 1993

CLARKE, B., MITTENTHAL, J. E. and SENN, M., A Model for the Evolution of Networks of Genes 269

MCCOLLUM, G., Reciprocal Inhibition, Synergies, and Movements . . 291

CZERLINSKI, G. H., Resolving the Fast Equilibrations of Ternary Complexes in Liver Alcohol Dehydrogenase 313

BARBET, J., LE DOUSSAL, J.-M., GRUAZ-GUYON, A., MARTIN, M., GAUTHEROT, E. and DELAAGE, M., Computer Calculation of Multiple Binding Equilibrium Isotherms: Application to the Binding of Bivalent Ligands to Antibodies Interacting with Cell Surface Fc-receptors 321

SZATHMÁRY, E., Co-operation and Defection: Playing the Field in Virus Dynamics 341

BERGNER, P.-E. E., On Kinetics of Classic Particles: Mean Values of State Functions 357

STADLER, P. F. and GRÜNER, W., Anisotropy in Fitness Landscapes . . 373

VASILAKOS, K. and BEUTER, A., Effects of Noise on a Delayed Visual Feedback System 389

TAYLOR, T. W., GOTO, Y. and SUGA, H., On the Solutions of Huxley-type Models in Cardiac Muscle Fiber Contractions. 409

LUDWIKÓW, F. and LUDWIKÓW, G., A Two-compartment Model of Micronucleus Formation in Erythrocytes and its Application to Mouse Bone Marrow. I. Rectangularly Transient Action of Clastogen in Stationary Conditions 417

OSBORN, J. W., A Model Simulating Tooth Morphogenesis without Morphogens 429

LETTER TO THE EDITOR

KÜHN-VELTEN, W. K., Fusion of Enzyme Kinetics with Quantitative Cell Biology Constitutes a Novel, Synergistic Approach to Calculate Local Enzyme Activities *In Situ* from Subcellular-site Concentrations of Enzymes and Their Substrates: An Endocrinologist's Contribution to the "Metabolite Channelling" Debate 447

Number 4, 21 *December* 1993

BEAUMONT, M. A., Evolution of Optimal Behaviour in Networks of Boolean Automata 455

VARMA, A. and PALSSON, B. O., Metabolic Capabilities of *Escherichia coli*: I. Synthesis of Biosynthetic Precursors and Cofactors 477

VARMA, A. and PALSSON, B. O., Metabolic Capabilities of *Escherichia coli* II. Optimal Growth Patterns 503

HANNON, B., The Optimal Growth of Helianthus Annuus 523

LIU, W.-M., A New Pharmacodynamic Model of Antiarrhythmic Drugs . 533

GUERON, S. and LEVIN, S. A., Self-organization of Front Patterns in Large Wildebeest Herds 541

NUÑO, J. C., MONTERO, F. and DE LA RUBIA, F. J., Influence of External Fluctuations on a Hypercycle Formed by Two Kinetically Indistinguishable Species 553

HUSIMI, Y., MORI, T., USHIJIMA, S. and AITA, T., Modes of Population Changeovers in Continuous Culture of Bacterial and Viral Mutants Spectrum 577

BAIER, G., THOMSEN, J. S. and MOSEKILDE, E., Chaotic Hierarchy in a Model of Competing Populations 593

ALLEN, J. F., Control of Gene Expression by Redox Potential and the Requirement for Chloroplast and Mitochondrial Genomes . . . 609

SNEYD, J., ATRI, A., FERGUSON, M. W. J., LEWIS, M. A., SEWARD, W. and MURRAY, J. D., A Model for the Spatial Patterning of Teeth Primordia in the Alligator: Initiation of the Dental Determinant 633

COLOSIMO, A., MORANTE, S., PARISI, V. and ROSSI, G. C., An Improved Method for Detection of Words with Unusual Occurrence Frequency in Nucleotidic Sequences 659

ERRATUM 673

Index to Volume 165

ACERENZA, L., Metabolic control design, 63
AITA, T. (see HUSIMI, Y.), 577
ALLEN, J. F., Control of gene expression by redox potential and the requirement for chloroplast and mitochondrial genomes, 609
Alligator, spatial patterning of teeth primordia in, 633
Amino acid properties and protein compressibility, relationship between, 87
Anisotropy in fitness landscapes, 373
Ant colonies model, energy function for, 177
Antiarrhythmic drugs, a new pharmacodynamic model, 533
Antibodies interacting with cell surface Fc-receptors, binding of bivalent ligands to, 321
Antigenic challenge of the immune system; synergy of idiotypic interactions and memory B cells, 1
ATRI, A. (see SNEYD, J.), 633

Bacterial and viral mutants spectrum, modes of population changeovers in continuous culture of, 577
BAIER, G., THOMSEN, J. S. and MOSEKILDE, E., Chaotic hierarchy in a model of competing populations, 593
BARBET, J., LE DOUSSAL, J. M., GRUAZ-GUYON, A., MARTIN, M., GUATHEROT, E. and DELAAGE, M., Computer calculation of multiple binding equilibrium isotherms: application to the binding of bivalent ligands to antibodies interacting with cell surface Fc-receptors, 321
BEAUMONT, M. A., Evolution of optimal behaviour in networks of Boolean automata, 455
Behaviour, optimal, in networks of Boolean automata, evolution of, 455
BEHN, U., VAN HEMMEN, J. L. and SULZER, B., Memory to antigenic challenge of the immune system: synergy of idiotypic interactions and memory B cells, 1
BERGNER, P.-E. E., On kinetics of classic particles: mean values of state functions, 357
BETHGE, K. (see MATTHECK, C.), 185
BEUTER, A. (see VASILAKOS, K.), 389
Binding equilibrium isotherms; computer calculation; binding of bivalent ligands to antibodies interacting with cell surface Fc-receptors, 321
Biomolecular structures, superconduction in; co-operative electron transfer, 225
Bone marrow, mouse; micronucleus formation in erythrocytes, 417
Boolean automata, evolution of optimal behaviour in networks of, 455

CANNINGS, C., TYRER, J. P. and VICKERS, G. T., Routes to polymorphism, 213
Cardiac muscle fiber contractions, Huxley-type solutions, 409
Cell division cycle: M-phase trigger, oscillations, and size control, 101
Cell surface Fc-receptors, binding of bivalent ligands to antibodies interacting with, 321
Channel, membrane, relaxation; statistical mechanical approach, 171
Chaotic hierarchy in a model of competing populations, 595
Chloroplast and mitochondrial genomes, requirement for; gene expression by redox potential, 609
CHOWDHURY, D., A unified model of immune response II: Continuum approach, 135
CLARKE, B., MITTENTHAL, J. E. and SENN, M., A model for the evolution of networks of genes, 269
Clastogen transient action; micronucleus formation in erythrocytes; mouse bone marrow, 417
Coding, multiple, and the evolutionary properties of RNA secondary structure, 251

Colonies, ants; energy function for model, 177
Colonies, honey bee, individual interests and intracolony conflict during swarming, 191
COLOSIMO, A., MORANTE, S., PARISI, V. and ROSSI, G. C., An improved method for detection of words with unusual occurrence frequency in nucleotide sequences, 659
Competing populations, chaotic hierarchy in a model of, 593
Compressibility, protein, and amino acid properties, relationship between, 87
Conflict, intracolony, during swarming of honey bee colonies, 191
Co-operation and defection: playing the field in virus dynamics, 341
Co-operative electron transfer; superconduction in biomolecular structures, 225
CZERLINSKI, G. H., Resolving the fast equilibrations of ternary complexes in liver alcohol dehydrogenase, 313

DELAAGE, M. (see BARBET, J.), 321
DE LA RUBIA, F. J. (see NÚÑO, J. C.), 553
Drugs, antiarrhythmic, a new pharmacodynamic model, 533

EDSTROM, R. D. (see ERNEUX, T.), 43
Eggs, hatching, temperature and moisture loss of, 27
Electron transfer, co-operative; superconduction in biomolecular structures, 225
Energy function for model of ant colonies, 177
Enzyme kinetics, fusion with quantitative cell biology (letter), 447
Enzyme sharing in phosphorylation-dephosphorylation cascades, 43
ERNEUX, T., EDSTROM, R. D. and GOLDBETER, A., Enzyme sharing in phosphorylation-dephosphorylation cascades: the case where one protein kinase (or phosphatase) acts on two different substrates, 43
Erythrocytes, micronucleus formation in; mouse bone marrow; action of clastogen, 417
Escherichia coli, metabolic capabilities of, 477, 503
Evolution and goodness-of-fit, 161
Evolution of networks of genes, 269
Evolution of optimal behaviour in networks of Boolean automata, 455
Evolutionary properties of RNA secondary structure, 251

Fc-receptors, cell surface, binding of bivalent ligands to antibodies interaction with, 321
Feedback system, visual, effects of noise on, 389
FERGUSON, M. W. J. (see SNEYD, J.), 633
Fitness landscapes, anisotropy in, 373

GAUTHEROT, E. (see BARBET, J.), 321
Gene expression control by redox potential, and the requirement for chloroplast and mitochondrial genomes, 609
Genes, evolution of networks of, 269
GHOSH, S., Relaxation of membrane channels: a statistical mechanical approach, 171
GOLDBETER, A. (see ERNEUX, T.), 43
GOTO, Y. (see TAYLOR, T. W.), 409
GROMIHA, M. M. and PONNUSWAMY, P. K., Relationship between amino acid properties and protein compressibility, 87
Growth, optimal, of *Helianthus annuus*, 523
Growth patterns, optimal; metabolic capabilities of *Eschericha coli*, 503
GRUAZ-GUYON, A. (see BARBET, J.), 321
GRÜNER, W. (see STADLER, P. F.), 373
GUERON, S. and LEVIN, S. A., Self-organization of front patterns in large wildebeest herds, 541

HANNON, B., The optimal growth of *Helianthus annuus*, 523
Hatching eggs, temperature and moisture loss of, 27

Helianthus annuus, optimal growth of, 523
Hierarchy, chaotic, in a model of competing populations, 595
HOGEWEG, P. (see HUYNEN, M. A.), 251
Honey bee colonies, individual interests and intracolony conflict during swarming of, 191
HUSIMI, Y., MORI, T., USHIJIMA, S. and AITA, T., Modes of population changeovers in continuous culture of bacterial and viral mutants spectrum, 577
Huxley-type solutions in cardiac muscle fiber contractions, 409
HUYNEN, M. A., KONINGS, D. A. M. and HOGEWEG, P., Multiple coding and the evolutionary properties of RNA secondary structure, 251
Hypercycle formed by two kinetically indistinguishable species, influence of external fluctuations on, 553

Immune response unified model; continuum approach, 135
Immune system, memory in antigenic challenge of; synergy of idiotypic interactions and memory B cells, 1
Inhibition, reciprocal, synergies, and movements, 291

Kinetics of classic particles: mean values of state functions, 357
KONINGS, D. A. M. (see HUYNEN, M. A), 251
KÜHN-VELTEN, W. K., Fusion of enzyme kinetics with quantitative cell biology constitutes a novel, synergistic approach to calculate local enzyme activities *in situ* from subcellular-site concentrations of enzymes and their substrates: an endocrinologist's contribution to the "Metabolite channelling" debate (letter), 447

LE DOUSSAL, J. M. (see BARBET, J.), 321
